There was no talk

Health, Safety and Welfare: nothing reported.

Risk Assessment and COSHH Forms: usual reminder please keep these up to date.

Lab matters:

One of the 3D printers is broken MM is trying to fix it.

The incubator (left hand side one) has been repaired.

A new Freeze Drier has been ordered. Big thanks to Royce.

DVB reported that a Lucozade bottle was discarded in the wrong place – the biowaste container.

Please remember (i) no drinking in the lab (ii) this type of waste goes in the normal bins.

Collagen supply: The new Collagen has arrived but Lillian is concerned that if we open it to test some it may invalidate the opportunity to send it back if it does not meet specification. Action: AP chase Collagen Solutions for the Certificate of Analysis.

Lab clean: Thank you for Lab Clean on July 10th (Group 2). Next lab clean is 14 August (Group 1).

Social: Punting is back on and we have booked to go on 1 July at St John's College.

Conferences: ESB 7-11 September 2026 Antwerp. The preliminary programme is out. Most of the group are scheduled for Tue/Wed/Thur of the week. Poster presentation times yet to be advised.

AOB: it happens that quite a few pieces of lab equipment are coming due for their service in July. This includes safety cabinet, autoclave, freeze drier. DVB will warn the Group which items are out of use for which dates.

Reminder to please always use PPMS for booking your equipment.

Postgraduate poster and seminar day is 29 June (today). If you can attend the seminar session to support Group members please go along to GS1 AT 14.40

Gaspare Degano has been made VP of the French Dentistry Students Union.

Date of next meeting: Monday 6 July 2026 (no talk).
